2012	<u>Asphalt works:</u> Geographical post offices are located in the places of postal codes on the roads and according to the instructions of the engineer and the price includes: Backfill works from the level of the site to the asphalt base layer. Plowing and compacting a layer with a thickness of 15 cm after leveling the full width to receive the foundation. Distribute and compact the base layer with a thickness of 15 cm in two stages, taking into account the pressure of the base layer well with water spraying to reach the maximum levels of assembly - Adjusting the levels and inclinations of the roads and handing them over to the supervising engineer. Spray the base layer with a substance (MC-1) to maintain the moisture of the base. Spraying a layer (R.C) before laying a layer of asphalt surfaces. Laying an asphalt surface layer with a thickness of 8 cm, taking into account the tendency to drain rainwater in roads. INCLUDING THE PAINT	M2	1,306.41	0.00	0.00	0.00	0.00	0.00	0.00	0%	0.00
